

C:/Dev/DungeonGenerator
/DungeonGenerator/Generator
/voronoiGenerator.hpp

```
graph BT; A["C:/Dev/DungeonGenerator/Generator/dungeonGenerator.cpp"] --> C["C:/Dev/DungeonGenerator/Generator/voronoiGenerator.hpp"]; B["C:/Dev/DungeonGenerator/Generator/voronoiGenerator.cpp"] --> C;
```

The diagram illustrates the relationship between three source files in a project. At the top is a header file, `voronoiGenerator.hpp`, located at `C:/Dev/DungeonGenerator/Generator/`. Below it are two source files: `dungeonGenerator.cpp` on the left and `voronoiGenerator.cpp` on the right, both also located in the `C:/Dev/DungeonGenerator/Generator/` directory. Blue arrows point from each source file to the header file, indicating that both source files include the header file.
