

C:/Dev/DungeonGenerator
/DungeonGenerator/Generator
/dungeonGenerator.hpp

```
graph BT; A["C:/Dev/DungeonGenerator/DungeonGenerator/dungeon.cpp"] --> C["C:/Dev/DungeonGenerator/DungeonGenerator/Generator/dungeonGenerator.hpp"]; B["C:/Dev/DungeonGenerator/DungeonGenerator/Generator/dungeonGenerator.cpp"] --> C;
```

The diagram illustrates the relationship between three source files in a project. At the top is a header file, `dungeonGenerator.hpp`, located at `C:/Dev/DungeonGenerator/DungeonGenerator/Generator/`. Below it are two source files. The file on the left, `dungeon.cpp`, is located at `C:/Dev/DungeonGenerator/DungeonGenerator/`. The file on the right, `dungeonGenerator.cpp`, is located at `C:/Dev/DungeonGenerator/DungeonGenerator/Generator/`. Both source files have blue arrows pointing to the header file, indicating that they include the header.
